

不锈钢彩色板使用说明书

USER'S INSTRUCTIONS

Stainless Steel Color Sheet

1. **Avoid collision:** Don't use hard objects to scratch or hit the stainless steel surface as it is thin and fragile.
2. **Regular cleaning:** Clean regularly to avoid dust and dirt on the surface with a neutral detergent and a soft cloth rather than a detergent containing abrasive powder.
3. **Waterproof:** Keep it dry. Do not contact with water for a long time or put it in a humid environment to protect its oxide layer and avoid fading.
4. **Avoid high temperature:** Don't put it in high-temperature environment to avoid fading as its surface is colored by chemical reactions.
5. **Protective film:** Please tear off the protective film within 3 months to avoid degumming. If the sheet needs to be processed, do not tear off the protective film before processing.

1. **避免碰撞:** 避免使用硬质物品刮擦或撞击彩色不锈钢表面, 因为其表面薄而脆弱, 容易被刮花。
2. **定期清洁:** 彩色不锈钢表面应定期清洁, 避免灰尘和污垢在表面积累。可以使用中性清洁剂和软布轻轻擦拭表面, 注意不要使用含有研磨粉末的清洁剂。
3. **防水:** 彩色不锈钢表面一般会覆盖一层透明漆或者氧化层, 这层保护层可以防止表面褪色。但是长时间的接触水和潮湿的环境会导致漆面或氧化层破裂, 进而导致表面褪色。因此, 在使用过程中应该避免长时间接触水, 尽量保持表面干燥。
4. **避免高温:** 彩色不锈钢表面的色彩是通过化学反应着色的, 高温会影响表面颜色和质量, 甚至导致表面褪色。因此, 在使用过程中应该避免高温环境, 如避免接触热水和高温物品。
5. **保护膜:** 请于 3 个月内撕掉保护膜, 避免脱胶。若板材需加工, 请勿在加工前撕掉保护膜。
